

# MESSINA, ELYSIA AND ARCADIA VIOLINS AND VIOLAS

Superb handcrafted instruments, carved from selected and figured tonewoods and ideal for the advanced student or young professional. These instruments are made in specialist hand workshops within the **Stentor** factory, where the most skilled individual workers produce under the close supervision of a master maker. This process produces fine instruments with their own unique characteristics. It is a traditional luthier's environment which would be familiar to makers throughout the centuries.
